

EpochField Workflow Builder

Create workflows configured to your
unique field work needs

**EpochField Workflow Builder is a web-based application
for administrators to build, view, & edit tasks**

EpochField Work Management Workflow Builder application provides a web-based experience for application administrators to build, view, edit, and configure the work types and tasks of any fieldwork. Users can create workflows and forms for any work type with custom fields and define cross-field validation rules for data entry and values.

Intelligent Work Order Forms

EpochField Workflow Builder is so simple to use, you wouldn't know that an entire code-base is behind the scenes, powering your field service processes. With a simple and easy-to-use interface, you can automate, integrate, and orchestrate any field service process.

- » Automate routine, manual field service operations processes.
- » Set up automated emails to your field workers with their weekly schedule.
- » Seamlessly integrate across your third-party, back-office, or in-house built systems.
- » Ensure 100% work order completion with quality control automation.
- » Automate business processes and workflows in an intuitive user experience, no coding required.
- » Notify field workers of work order assignments from corporate dispatch.

Our Success

EpochField's outstanding success has made Epoch Solutions Group a leading provider in modernizing a utility's field workforce. EpochField is a cost-effective solution with an intuitive interface and a suite of user-friendly tools that increases productivity while reducing operating costs. EpochField works as a foundation for your network and asset workflows, enabling enterprises to digitally transform, automate and streamline field service operations. Epoch Solutions Group continues to expand this functionality with the underlying focus and goal to provide the best tools and products to its customers.

**"I knew
we had achieved
success when one of
our most skeptical and
vocal crew trainers became an
instant power user of EpochField
out in the field."**
