

## Company Fact Sheet

### History

In 2006, Epoch Solutions Group was founded by geospatial industry leader James Street with a vision of empowering utility companies with data-driven insights and configurable solutions that optimize business processes, increase organizational efficiency, and enable workforce optimization.

Since then, the company launched EpochSync Pro, the industry's only dedicated solution for synchronizing data between Smallworld Version Managed Data Stores and the Esri Utility Network (UN). Epoch Solutions Group also launched EpochField, an industry-leading solution purpose-built for mobile field workers that integrates geospatial and workforce management.

Today, the company serves more than 20+ leading utilities serving 10M+ customers in the United States and Canada, and 30,000+ EpochField customers use the solution daily.
