

**EpochField  
Enterprise-Level  
Administrator**

- » The EpochField Administrator web application provides a suite of automated tools to easily manage dispatch areas and service territories.
- » Customers can validate and upload configuration files individually and in bulk, and configure the desired time of automatic logouts, map refreshes, and map unit preferences.

**EpochSync Pro GIS Data Migration Solution**

Enterprises constantly face the need to integrate geospatial asset information across systems within the organization. EpochSync Pro is the industry's only dedicated solution for synchronizing data between Smallworld Version Managed Data Stores and the Esri Utility Network (UN).

- » Smaller utilities to large enterprise organizations experience seamless migration using the Mapping Spreadsheet from Smallworld to Esri UN.
- » Expert-backed software, designed with Esri UN's complexities in mind.
- » Makes the extensive task of consolidation between GIS systems simple and effective.
- » Accurate object mapping and handling of Esri UN associations ensure data integrity throughout.
